Chapter 1. COMPANY INTRODUCTION

TK PIPING has grown to be a one of the largest stockiest and distributor in Korea of industrial fittings, pipe, flange and valves in the LNG Power, Petrochemical Plant, construction and process industries.

TK PIPING has main Office in Gasan-dong, Seoul, Korea and one warehouse in Hwasung, Korea.

Since establishment, TK Piping has established very close relationship with EPC and sub constructor as BUMJIN E&C, JUNGHO E&C, SUNGDO E&C etc.

We has grown a power of procurement through agent with global manufacturer such as ERNE FITTING, HUSTEEL , DEAKYUNG BEND, LONGSHAN PIPING SOLUTION, HANKUK VALVE and OS VALVE etc.

We strive to satisfy 100% of our clients' needs with continuous effort for technological development, innovation, and enhanced quality of our products.

TK Piping values building trust and relationship with our clients, and we truly look forward to developing businesses together in the future.

COMPANY OVERVIEW

Founded	Sep 13 th . 2018
Presidents	Kim Seongap
Employee	11 persons
Address	#413, Leaders Tower, 286, Beotkkot-ro, Geumcheon-gu, 08511, Korea
Warehouse	686 Seokpori Janganmyeon Hwasung-si, Gyeonggi-do, Korea
Contact Tel.	+82-2-858-8534 (Rep.)
Fax.	+82-2-858-8546 (Fax)
e-mail.	tkp@tkpiping.com

COMPANY OVERVIEW - LOCATION

SEOUL OFFICE

#413, Leaders Tower, 286, Beotkkot-ro, Geumcheon-gu, 08511, Korea

Chapter 3. Quality Manual

Chapter 3.

1. SCOPE

This Section defines the responsibilities and describes the control of the Quality System Manual. Also describes the management review to assure the effective implementation of QS Manual, and provides for indoctrination and training of personnel performing verifying, or managing activities affecting quality

2. Scope and applicabilities of QS Program

The Quality System Program described in this QS Manual encompasses the control program necessary for the supplying all of materials in accordance with the International Code and contractual requirements.

3. The scope of activities include the following

1) Receipt, identification, verification, handling, storage, and shipment of material or source material

- 2) Testing, examination, or treatments required by the material specification or the specific applicable material requirements of Code and certification of the results of such test, examination, or treatments
- 3) Qualification of material organization
- 4) Control of shipments of material from material organization to parties other then the party performing the qualification
- 5) Approval and control of supplier of source material or subcontracted services
- 6) Utilization of unqualified source material.

4. Quality system structure

This Quality System Manual takes into consideration of the technical aspects and provide for planning and accomplishment of activities affecting quality. The program takes into account the need for any special controls, processes, test equipment, tools and skills to attain the required quality and for verification of quality by examination, inspection or test to manufacture the acceptable materials.

5. Control of Quality System Manual

The Quality System Manual and revision thereto shall be prepared and maintained by the QA Team

The Quality System Manual and revision thereto shall be reviewed by the QA Manager, and approved by President

The Quality System Manual is revised on each Section basis, and identified with an under line on the portions of applicable paragraph and revision number and date on the Section II Table of Contents.

6. Distribution of Quality System Manual

The QS Manual shall be responsible for maintain current with the latest revisions by the QA Manager. Only controlled copies of the Quality System Manual shall be distributed for use within SAMKWANG organization and personnel and Controlled copies may be distributed outside SAMKWANG at the discretion of the QA Manager.

The Controlled QS Manual cover sheet shall be identified with the control number including indication of controlled of uncontrolled status.

The QA Team shall be responsible for distribution of the QS Manual and maintenance of the Distribution Control Log

For internal distribution of the QS Manual, copies shall be hand carried to the President and all Managers, as a minimum. QS Manual to be distributed outside SUNJIN shall be sent with a Document Transmittal Sheet. Distribution of revisions to controlled Quality System Manual shall be handled in the same manner as the original distribution.

Internal holders shall be required to make replacements of revised Sections upon receipt.

External holder of a controlled copy will be requested to return a signed Document Transmittal Form within the date specified thereon indicating that the revision has been received and the obsolete Section(s) destroyed.

7.Indoctrination and Training

Responsibilities

The QA Manager shall be responsible for the overall Indoctrination and Training program for indoctrination and training of all personnel and monitoring for performance of Indoctrination and Training and follow-up action.

General requirements

Training programs shall be established to provide for indoctrination and training, as necessary, of employees performing activities affecting quality

- (1) Training shall be provided, as needed, to achieve initial proficiency, maintain proficiency, and adapt to changes in technology, methods, and job responsibilities. Training for maintain proficiency shall be performed by QA Manager for
 - (a) The Code has been changed;
 - (b) The QS program has been revised;
 - (C) The each Manager has specific reasons to question maintaining proficiency of his personnel considering the issue of NCR or CAR.
- (2) The extent of indoctrination and training shall be commensurate with the scope, complexity, and nature of the activity as well as the education, experience, and proficiency of the person.
- (3) Training programs shall include;
 - (a) Personnel to be indoctrinated or trained shall be identified.
 - (b) Basic job duties, functions, and responsibilities as related to other Individuals and Teams.
 - (c) Functions related to the various Chapters of the QS Manual, supporting procedures and associated documents.
 - (d) Spec Code and other Standards
 - (e) Training shall be provided, as needed, to achieve initial proficiency, maintain proficiency, and adapt to changes in technology, methods, and job responsibilities.
- (4) Training Record

Training Record shall be included date and time, instructor name and position, Course subject and Attendees

8. Qualification of Inspection and Test Personnel

Inspection and Test Personnel who perform inspection or test activities to verify conformance to specified requirements for the purpose of acceptability shall be qualified and certified. Inspection personnel are performed activities such as receiving inspection, in-process inspection, final inspection and shipping inspection and test personnel are performed activities chemical analysis and mechanical test.

Inspection and Test Personnel shall be qualified and certified in accordance with the inspection and Test Personnel Qualification Procedure.

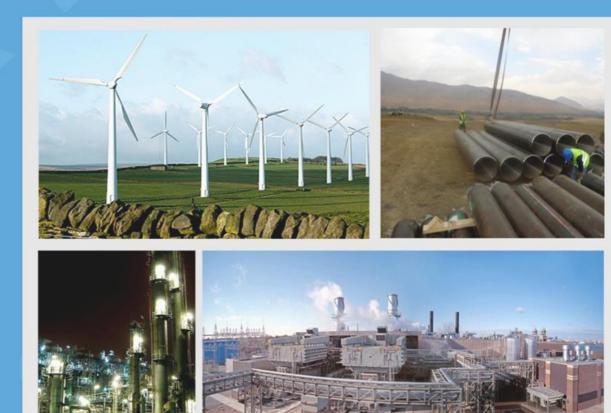

(1)Initial proficiency of inspection and test personnel shall be determined by evaluation of prospective personnel's education, experience, training, and either examination result or capability demonstration.

(2)Inspection and test personnel shall be re-qualified at least three(3) years prior to the expiration date of qualification by Quality & Metallurgy Manager in accordance with the following criteria;

(3)The QA Manager shall review the qualification records and, upon satisfaction, sign and date on the Inspector Qualification Record and maintain qualification records.

(4)The QA Manager may require requalification of an Inspection and Test Personnel when either one has a specific reason to question the capability of Inspection and Test Personnel
